In this assignment, students are expected to elicit appropriate requirements for their own project. There should be enough requirements to provide sufficient scope to finish the project in two semesters. To this end, students are required to:

1. Identify actors
2. Identify use cases
3. Identify relationships among actors and use cases
4. For each use case, document it using the table shown in Figure 4-7 of the textbook on page 135. To document a use case, refer to the writing guide shown on page 137 of the textbook.
5. Follow rigorously the writing guide for use cases shown in Figure 4-8 of the textbook on page 137.
6. Submit the documented use cases in a single document.
